

SINN Power develops and projects power generation plants in the field of renewable energies on land and water. Floating photovoltaic systems are our core business. Besides the SOcean for power generation from wind, wave and sun for harsh conditions at sea, we also offer solutions like the SLagoon and the SLake, which are perfectly suited for calmer waters. A second business area deals with land-based photovoltaic systems.

An exciting market that is more important than ever, because with the energy transition we are facing a real challenge. Working at SINN Power you have the chance to actively contribute to a green future. Join us and become part of our team. We are looking for you as a Technical Project Manager.

Technical (Senior) Projectmanager (f/m/d) fulltime, in Munich

As a project manager at SINN Power, you will be the central contact person for all projects assigned to you and as such will be responsible for the distribution of tasks in the project team as well as for the control of all relevant project processes. In line with our product portfolio, this will primarily involve PV systems on land and water, a combination of both, or other renewable energy sources.

Within the scope of this activity

- you are the link between employees from various departments and the customer and as such responsible for a smooth project flow from financial closing to commissioning, the grid connection and the final handover
- you are responsible for the achievement of all contractually defined milestones and the management of liquidity, schedule and costs
- you continuously work on the implementation and improvement of project management related guidelines, processes and tools in order to ensure a structured project implementation as well as to minimize project risks and to accelerate processes
- you communicate independently with the customer as well as with all relevant players in-house and on site (specialist departments, assembly teams, external service providers, etc.)
- you are responsible for the ongoing documentation and reporting of your projects in terms of scope, schedule, cost, risk, quality, contracts etc.

Requirements

- You have a university degree and at least 3 years of experience in project management - ideally in the field of renewables or a similar field
- You are experienced in dealing with customers as well as with employees from the technical environment
- You convince with a confident and sovereign appearance as well as negotiation skills
- You have an affinity for technology and are enthusiastic about renewable energies
- You have a very good understanding of numbers and profitability
- You are stress-resistant and maintain an overview even under time pressure
- You work independently, on your own responsibility and in a structured manner
- You are a team player and have the desire to actively shape the energy transition
- You have very good German and English skills

Why us?

- For us, the energy transition is not a 2022 issue - we have already been working on a green future for more than five years
- With our forward-looking technologies in the field of floating renewables we offer you a meaningful job and the opportunity to conquer a completely new growth market
- We pay a fair salary
- We offer you flexible working hours and 30 vacation days per year
- We are a dynamic, success-oriented, young and familiar team with flat hierarchies
- We have good transport connections and free parking spaces
- You enjoy regular lunches together and free sports facilities in our own garden

Sounds like you?

Then please send your cover letter and resume to jobs@sinnpower.com
